Document title is In-person versus Telenutrition

Document language is English

There are two infographics; the first one shows that three times more people signed up for telenutrition appointments than in-person appointments (53 in-person versus 147 telenutrition). The second one shows the percentage of patients who showed up for their follow-up visit if it was in-person versus if it is telenutrition (79.2 percent in-person versus 95 percent telenutrition).
